

ATTENTION

Kansas deer hunters!

Are you ready to say goodbye to big bucks like this?

Don't let bureaucrats
take away your lifestyle!

**The KDWP Commission
Plans To Ban Deer Feeding In Kansas**

"I think the Commissioners would all ban baiting today. ...
That is our track—to ban baiting in time. ... **That is our intention.**"

-Wildlife and Parks Commission Member Troy Sporer,
06-22-23 Commission meeting.

**Act now to stop this
government overreach!**

Kansas has gone from last place to one of the top deer hunting states in the country with over 640,000 whitetails. Deer feeding has played a big part in that success!

KDWP claims feeding spreads Chronic Wasting Disease (CWD)

FACT: States with highest CWD rates have **restricted or banned** feeding for decades, yet high CWD rates have remained.

FACT: Supplemental feeding improves herd nutrition levels making deer **less** susceptible to CWD and other diseases.

FACT: Kansas has lower CWD cases than other mid-western states and we have **always** allowed deer feeding.

Harmful effects will occur if the Commission bans deer feeding:

- 1. The Kansas deer population will shrink.**
 - KDWP admits that feeding results in increased deer populations.
- 2. Encouraging youth to take up deer hunting will be harder.**
 - Seeing deer up close while hunting is the best way to get kids excited and maintain their interest.
- 3. Archery hunting will become more difficult.**
 - Archery hunting success relies on bringing deer close to the hunter. Feeding increases close encounters.
- 4. Kansas landowners' property values will decrease.**
 - Successful deer hunting has significantly raised rural land values.
- 5. Kansas will lose revenue and local businesses will suffer.**
 - Hunting brings in over \$700,000,000 to the Kansas economy annually.

TAKE ACTION NOW!

CALL OR EMAIL THE COMMISSIONERS AND TELL THEM TO KEEP DEER FEEDING LEGAL IN KANSAS!
